

I-Control

Interstates Control Systems is proud to present I-Control, the feed mill control package that delivers the benefits of custom-designed software at a more competitive price. Modular programming allows automation of parts of the feed mill at a time that allows for gradual automation. Quality components and excellent on-going support ensure maximum up-time and lower long-term costs.

SERVICES:

- Modular Programming
- Automatic Sequencing
- Lot Tracking
- Automatic Free Fall Adjust
- Allen Bradley PLCs
- Data Collection & Reporting
- ERP Integration Options
- Affordable Quality Support

Our experience with Interstates Control Systems' batching program has been very positive. The system is both fast and accurate.

-A Midwest Feed Manufacturer
