

MES Consulting Services

MES PRODUCTS

Interstates will help implement OEM vendor MES packages including GE Proficy Plant Applications, Wonderware ArchestA, Rockwell Production Centre, Siemens Symatic IT, and more.

Additionally our I-Track and I-Control products are effective solutions for food and feed industries.

BUSINESS INTEGRATION

Interstates has interfaced to a variety of ERP systems including SAP and JD Edwards. We also have experience interfacing to scheduling, formulation, inventory management, and other business transaction software.

Our Interface experience includes the following: Vendor, Receipts, Inventory, Production, Scheduling, Quality, Formulation, Product, Shipping Customer, Downtime, etc.

PRODUCT MANGEMENT

Interstates has over 15 years of experience implementing best-fit production management systems including: Inventory Management, Quality Control, Production Scheduling, Batch Execution, etc.

OPERATIONAL EFFECTIVENESS

In more recent years, Interstates has helped our clients grow their operations in the following MES areas: Efficiency, Traceability, Geneology, Quality, Workflow, Downtime, Batch Analysis, etc.

DATABASE SERVICES

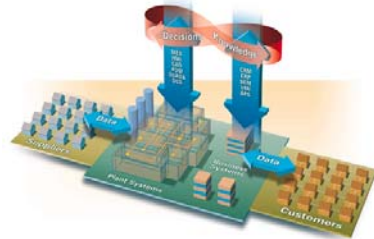

Our database professionals are experienced in Oracle, SQL Server, DB2, and other databases. This experience includes all aspects of database administration as well as custom database programming.

DATA COLLECTION AND REPORTING

Interstates has experience collecting real-time and transactional data through historian and other data collection tools. Through this, valuable reports and dashboards are developed to effectively manage manufacturing.

CUSTOM DEVELOPMENT

Our certified professional programmers provide integrated solutions to bridge the gaps between ERP, MES, and automation systems.
